

SOUND ENGINEERING

WANT TO BECOME A SOUND ENGINEER

An sound engineer (also sometimes recording engineer or a vocal engineer) works on the recording, manipulating the record using equalization and electronic effects, mixing, reproduction, and reinforcement of sound. - wikipedia

Sound engineers work behind the scenes at concerts, studios, theatres, and other venues. Could sound engineering be the right job for you?

Getpix Creative College offers a range of sound engineering courses to suit all needs.

Our part time courses are designed for those inspiring that have limited time to study. We start at the very beginning and help you develop your skills.

For those who want to make sound engineering their career, we offer a 6 month course.

6 MONTH SOUND ENGINEERING COURSE

About The Course:

If you are that person that lives and dies for music, enjoys concerts, bands, live shows, performances, studios and mixing desks, then a career in sound engineering may be for you. One of the jobs of a sound engineer is to perfect the projection and quality of sound for audience to hear.

At Getpix Creative College we teach the basics of music production, sound setup and live venue gigging as well as music theory, music styles, aural training, music culture and basic copyright laws. You will spend time learning the relationship of musical instruments along with theory and rhythm. In addition you will learn how to record in a studio, assisting on stage, set up a PA system, rig speakers, set up amplifiers and processing systems. Learning software will set the ball in motion.

6 MONTH SOUND ENGINEERING COURSE

Computer Specifications - Minimum:

- i3 Processor, i5 or higher recommended
- 4Gig RAM, 8Gig or higher recommended
- At least 4-8Gig of hard drive space
- 1 Gig graphics card required, Dedicated card such as Nvidia or AMD strongly recommended
- Screen resolution of at least 1024x768, 1280x1024 recommended

Please note: the faster your machine, the quicker it will run as well as quicker the files will render. It is recommended to go for the fastest you can afford but for those strapped for cash, the minimum specs will be sufficient. I will just take a little longer to get things done.

PART TIME SOUND ENGINEERING COURSE

Our part time courses, comprise of 4 lessons of 4 hours each, once a week, for a duration of a month.

Classes are kept small, to a maximum of 8 students, to ensure maximum attention from our instructors.

We cover the important theory without you having to go through the boredom of reading the manual. The practical work during classes will keep you on your toes and seeing objects from a different perspective.
